

MOINUL ISLAM SHAD

Full Stack Software Engineer · Technical Lead

mshad732@gmail.com | +880 1886893619 | Dhaka, Bangladesh | github.com/msaaad | [linkedin.com/in/m-i-saad-45b81b171](https://www.linkedin.com/in/m-i-saad-45b81b171)

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 3+ years of hands-on experience designing, developing, and delivering scalable web applications across e-learning, e-commerce, payroll management, and secure communication platforms. Proven track record of leading development teams, architecting full-stack solutions, and collaborating with clients to translate business requirements into robust technical implementations. Experienced in Agile/Scrum environments with a strong commitment to clean, maintainable code and high-quality delivery.

TECHNICAL SKILLS

Frontend	JavaScript (ES6+), TypeScript, Vue.js, Vuex, React.js, Redux, Next.js, jQuery, HTML5, CSS3, Bootstrap, Tailwind CSS
Backend	Node.js, Express.js, Nest.js, PHP, Laravel, WordPress
Databases	MySQL, PostgreSQL, MongoDB (Mongoose ODM), TypeORM
Cloud & DevOps	AWS S3, Docker
Real-time	Socket.io, WebSockets
Integrations	Stripe API, GetLate, Webhook Handling
Practices	RESTful API Design, Agile/Scrum, TDD, i18n (English/French), Responsive Web Design, Code Reviews
Tools	Git, GitHub, Team Leadership, Client Communication

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer & Technical Lead · Annonlab · Dhaka, Bangladesh *March 2023 – Present*

Leading full-stack development and cross-functional teams across multiple concurrent production projects in an Agile/Scrum environment. Supervised and mentored a frontend intern for 4 months.

Paypipol — Payroll Management SaaS | Technical Lead & Full Stack Developer *June 2023 – Present*

- Owned 3 repos (backend API, tenant service, Admin panel); greenfield-designed the Admin panel solo — full architecture, React/Redux FE and BE from scratch
- Architected multi-tenant isolation with per-branch database separation; built RBAC employee management, automated payslip generation, DSN reports, and debit file creation
- Implemented English/French i18n across Paypipol and Admin panel

Stack — React, Redux, Vue.js, Vue-Bootstrap, Laravel, MySQL

OuiSkill (Filgood) — AI-Powered E-Learning Platform | Full Stack Developer *Aug 2024 – Present*

- Built AI-heavy mental health and skills platform: AI post generation, AI thesis generator (rich text + composite image slides with background/overlay text + sliders), and Duolingo-style interactive AI course engine
- Developed community module with gamification milestones, reactions, and social sharing (YouTube, Facebook) via GetLate; organisation/team course management with progress tracking and mental health assessment quiz
- Integrated Stripe (webhooks), Socket.io real-time notifications, AWS S3 file storage, and English/French i18n

Stack — Vue.js, Vuex, Node.js, Express.js, MySQL, Socket.io, Stripe API, AWS S3

FBLike — Social Networking Platform | Full Stack Developer *May 2023 – Aug 2023*

- Developed full social networking platform with posts, stories, real-time chat, notifications, groups, and course modules

Stack — WordPress, Custom Plugin Development

Moolynet — Email Marketing Software | Frontend Developer *Mar 2023 – May 2023*

- Developed task management and campaign handling interfaces for a marketing automation platform

Stack — *PHP, jQuery, Semantic UI*

Freelance · Team Lead & Backend Developer · Judicial Magistrate Project (JMP) *2025*

Freelance engagement to build a secure communication platform for Bangladeshi judicial magistrates handling sensitive legal correspondence.

- Architected and implemented a secure multi-factor authentication system for high-sensitivity legal users
- Developed encrypted messaging infrastructure ensuring end-to-end security for legal communications
- Implemented AWS S3 file storage with strict secure access controls
- Collaborated with a React/TypeScript frontend team to deliver a seamless, secure user experience

Stack — *Node.js, PostgreSQL, TypeScript, TypeORM, AWS S3, React*

Full Stack Web Developer (Contract) · Dreams Eye · Dhaka, Bangladesh *June – October 2021*

Sole developer on a complete multi-vendor e-commerce platform for fashion retail.

- Built multi-vendor platform for sunglasses and watches with vendor verification (TIN certificates, business licences)
- Developed responsive Vue.js frontend with intuitive product browsing, checkout, and full order tracking
- Built Laravel backend for vendor management, product catalogue, order processing, and secure payment gateway
- Delivered the complete platform within the 5-month contract period

Stack — *Vue.js, Vuex, Laravel, Bootstrap, MySQL*

EDUCATION

B.Sc. in Computer Science & Engineering *2017 – 2021*

Mawlana Bhashani Science and Technology University, Tangail, Bangladesh

Final Year Project: Deep Fake Video Generation — machine learning model for synthetic video content using deep learning
