PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 3+ years of hands-on experience designing, developing, and delivering scalable web applications across diverse domains including e-learning, e-commerce, payroll management, and secure communication platforms. Proven expertise in leading development teams, architecting full-stack solutions, and collaborating directly with clients to translate business requirements into robust technical implementations. Adept at working with modern JavaScript frameworks, RESTful APIs, real-time communication systems, and cloud services. Strong foundation in both frontend and backend technologies with a commitment to writing clean, maintainable code.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), Vue.js, Vuex, React.js, TypeScript, jQuery, HTML5, CSS3, Bootstrap, Tailwind CSS, Vue-Bootstrap, Semantic UI

Backend: Node.js, Express.js, Nest.js, PHP, Laravel, WordPress

Databases: MySQL, PostgreSQL, TypeORM

Cloud & DevOps: AWS S3, Docker

Development Practices: RESTful API Design, Real-time Communication (Socket.io), Test Case Development, Responsive Web Design, Agile Methodologies

Version Control & Collaboration: Git, GitHub, Team Leadership, Client Communication

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer & Technical Lead *March 2023 – Present*

Annonlab · Dhaka, Bangladesh

Leading full-stack development initiatives and managing cross-functional teams while maintaining hands-on coding responsibilities across multiple concurrent projects.

Paypipol — Payroll Management System (SaaS) | Technical Lead & Full Stack Developer | June 2023 – Present

- Led development team in maintaining and enhancing a multi-tenant SaaS application serving multiple organisations
- Architected tenant isolation system where each branch maintains a separate database, ensuring data security and scalability
- Developed comprehensive company and employee management modules with role-based access control
- Implemented automated payslip generation with customisable templates, DSN reports, and debit file creation

Technologies: Vue.js, Vue-Bootstrap, Laravel, MySQL

Judicial Magistrate Project (JMP) — Secure Communication Platform | Team Lead & Backend Developer | Sep 2024 – Present

- Leading development of a secure communication platform for Bangladeshi judicial magistrates handling sensitive legal correspondence
- Architected and implemented secure authentication system with multi-factor verification
- Developed encrypted messaging infrastructure ensuring end-to-end security for legal communications
- Implemented file storage solution using AWS S3 with strict secure access controls
- Collaborated with frontend team using React and TypeScript to deliver a seamless user experience

Technologies: Node.js, PostgreSQL, TypeScript, TypeORM, AWS S3, React

OuiSkill (Filgood) — E-Learning Platform | Full Stack Developer | Aug 2024 – Present

- Developed comprehensive mental health and skills development platform with AI-powered content generation
- Implemented mental health assessment quiz system with intelligent course recommendation engine
- Built organisation and team-based course management with progress tracking and gamification features
- Developed community management enabling users to create, react to, and share posts across social platforms (YouTube, Facebook) via GetLate integration
- Integrated Stripe payment gateway with webhook handling for secure transaction processing
- Architected real-time notification system using Socket.io for instant user engagement

Technologies: Vue.js, Vuex, Node.js, Express.js, MySQL, Socket.io, Stripe API

FBLike — Social Networking Platform | Full Stack Developer | May 2023 – Aug 2023

- Developed full social networking platform featuring posts, stories, real-time chat, notifications, groups, and integrated course modules
- Implemented real-time communication features for instant messaging and live notifications

Technologies: *WordPress, Custom Plugin Development*

Moolynet — Email Marketing Software | Frontend Developer | Mar 2023 – May 2023

- Developed task management system and campaign handling interface for an email marketing platform
- Created responsive user interfaces for complex marketing automation workflows

Technologies: *PHP, jQuery, Semantic UI*

Full Stack Web Developer (Contract) June 2021 – October 2021

Dreams Eye · Dhaka, Bangladesh

- Developed multi-vendor e-commerce platform for fashion retail specialising in sunglasses and watches
- Implemented comprehensive vendor verification system requiring TIN certificates and business licences for identity authentication
- Built responsive frontend interface using Vue.js with intuitive product browsing and checkout experience
- Developed backend infrastructure using Laravel for vendor management, product catalogue, and order processing
- Integrated secure payment gateway and implemented full order tracking system
- Successfully delivered the complete platform within the 5-month contract period

Technologies: *Vue.js, Vuex, Laravel, Bootstrap, MySQL*

EDUCATION

Bachelor of Science in Computer Science and Engineering *2017 – 2021*

Mawlana Bhashani Science and Technology University, Santosh, Tangail, Bangladesh

CGPA: 3.04 / 4.00

Final Year Project: *Deep Fake Video Generation — developed a machine learning model for generating synthetic video content using deep learning techniques*

KEY ACHIEVEMENTS & COMPETENCIES

Team Leadership: Successfully led multiple development teams, managing both technical direction and hands-on development across concurrent projects

Client Management: Proven ability to gather requirements, propose technical solutions, and maintain ongoing communication with stakeholders

Code Quality: Established as a role model for writing clean, maintainable, well-tested code and following software development best practices

Full Stack Expertise: Demonstrated proficiency across the entire technology stack — from frontend frameworks to backend APIs and database design

Rapid Delivery: Consistently delivered complex projects within agreed timelines while maintaining high code quality standards

Problem Solving: Strong research and development capabilities for identifying optimal technical approaches to complex business challenges

LANGUAGES

Bangla: Native **English:** Professional Working Proficiency
